Vacancy Project Engineer (m/f)

We are currently looking for a dynamic and independent Project Engineer to join the engineering department based in Brussels, Belgium. You will help to secure the international growth of Skytanking and contribute to handle the increasing workload in a professional manner.

The team of engineers within Skytanking is responsible for all engineering and consultancy contracts, both local and international (Qatar, Malta, Luxembourg, India, Indonesia, Vietnam, Maldives, Mongolia, Argentina, UK, Italy, South Africa...). We can proudly say that this team of engineers is known worldwide for its expertise in aviation fuelling, which has been built up in the past 20 years.

Your tasks:

- Build excellent relationships and promote Skytanking’s engineering expertise among all aviation infrastructure owners including airports, oil companies, local authorities and airlines;

- Apply engineering principles and practices to ensure that aviation infrastructures are designed, constructed, renovated and/or maintained
  - in a safe, cost effective and timely manner;
  - in line with local and international standards and the requirements set forward by the client;

- Serve as project engineer on projects (mechanical, automation, electrical,...), including defining the project scope, selecting consultants and contractors, negotiating contracts, preparing, monitoring and steering of project schedules;

- Conduct field and construction site inspections. Manage interfaces between different techniques in a project and provide technical guidance during detection of problems;

- Coordinate projects with the airport authorities, local authorities and other relevant stakeholders;

- Evaluate contractor’s requests for extra work, enforce terms of the contract, process payments and change orders. Resolve possible contractual disputes;
Execute technical audits on Skytanking facilities and provide technical guidance to resolve observations;

Work in a dynamic and flexible team;

Report to the Head of Engineering or project related to the Manager Engineering projects.

Your profile:

Diploma
  - Master in Industrial Engineering.

Languages
  - French (fluent);
  - English (fluent);
  - Dutch (good working knowledge)

IT
  - Good knowledge of MS-Office (Excel and Project Planner) and experience with AutoCAD (or similar drawing package).

Interests
  - Broad appetite for all techniques (mechanics, electricity, automation and hydraulics);
  - Working in an international environment;
  - Attracted by a challenging job involving responsibilities.

Skills
  - Punctual, accurate, flexible and independent;
  - Experience in technical project management (~ 3 years);
  - Experience in the petroleum sector is a plus;
  - Planned and proactive approach respecting agreed deadlines.
  - Social skills
    - Team player;
    - Steering and negotiation skills towards contractors, government institutions and other consultancy companies;
- Supportive and clear communication with clients;
- Transparent reporting within the company;
- Respectful towards other cultures.

- Engagement
  - Determined to sign up for a long-term cooperation;
  - Open to new challenges and willing to learn through self-education and internal/external trainings;
  - Eager to work in an international environment;
  - Prepared to travel for longer periods.

**We offer:**

- A well-paid position in the demanding working environment of aviation and petroleum sector.
- A full time contract
  - With benefits in kind (laptop, smart phone, car, food vouchers);
  - Providing specific benefits as applicable in the petroleum sector

**How to apply:**

Please send your application (CV and cover letter) in English indicating your salary expectations and the earliest possible starting date to Mr. Bart Kinnaert at [bart.kinnaert@skytanking.com](mailto:bart.kinnaert@skytanking.com). Should you have any questions, please do not hesitate to contact Mr. Kinnaert

**About us**

Skytanking provides a full range of aviation fuelling services including into-plane fuelling, aviation fuel storage and hydrant management, investment in aviation fuel facilities at airports and engineering. Its customers are airlines, airports, and oil companies. The company currently handles 15.8 million cbm of aviation fuel per year, refuels 1.4 million aircraft – which is equivalent to two fuelling per minute – and has operations at 69 airports in 13 countries in Europe, Asia and Africa. Skytanking employed 1.300 people at the end of 2016.
